About the Association

The Indian Association of Chartered Physiotherapists (IACP), Asia's first and the world's third Chartered Physiotherapy Association, offers a selection of advanced fellowship programs designed for physiotherapists seeking to expand their expertise through research, self-directed learning, and thesis work. These fellowships emphasize self-learning and research, making them ideal for practitioners desiring autonomy and flexibility in their professional development. As India's second-largest physiotherapy association, IACP maintains rigorous standards to support evidence-based practice and professional growth. Through these fellowships, participants contribute to the physiotherapy field by conducting meaningful research in their chosen specialty.

Mission and Vision

➔ Mission

To give the experienced and valued physiotherapists practicing in the industry the status of Chartered Physiotherapists.

➔ Vision

To differentiate the chartered physiotherapists from the crowd and provide them a platform & granting them the standard of chartered physiotherapist.

Course Title and Overview

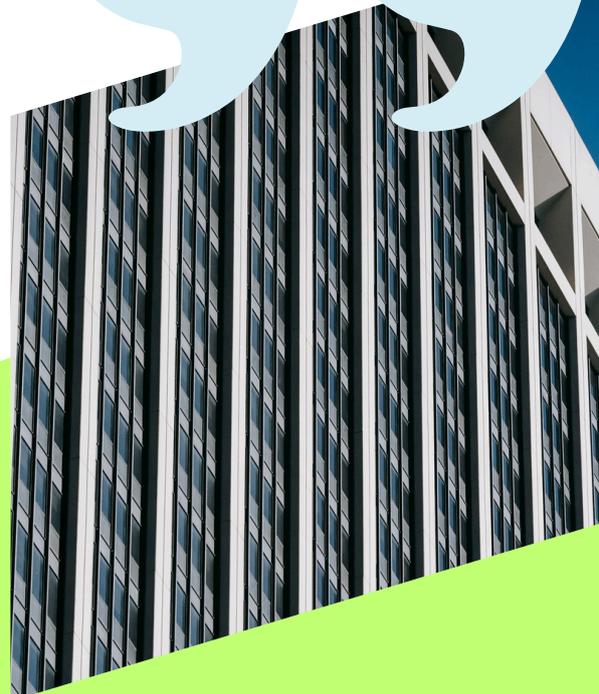

Fellowship in Sports Physiotherapy

Fellowship in Neurological Rehabilitation

Fellowship in Orthopedic Manual Therapy

Fellowship in Pediatric Physiotherapy

Course Objective

Develop expertise in sports injury assessment, management, and rehabilitation.

Engage in research-focused learning, enhancing critical thinking and evidence-based practice in sports physiotherapy.

Contribute original research in sports physiotherapy, advancing the field and improving patient outcomes.

Fellowship Options & Batches-

- ➔ Fellowship in Sports Physiotherapy
- ➔ Fellowship in Neurological Rehabilitation
- ➔ Fellowship in Pediatric Physiotherapy
- ➔ Fellowship in Orthopedic Manual Therapy

Upcoming Batches & Seats:

January	2026	<i>(Limited 4 to 5 Total Seats per Batch)</i>
March	2026	
May	2026	
June	2026	
August	2026	
October	2026	
December	2026	

Teaching and Learning Methodology

Self, Online, Research Oriented

- The Fellowship is conducted entirely online and is a Research Fellowship.

Assessment and Evaluation

➔ Research Thesis:

Research Thesis: Submission of a research file at the end of 6 months, evaluated by IACP-appointed faculty members.

➔ Grading:

Grading: The faculty bench assesses submissions for academic rigor and relevance.

➔ Certification:

Certification: Awarded to participants achieving passing grades.

Prospects and Future

Graduates of the IACP Fellowships
are equipped to:

➔ Fellowship in Sports Physiotherapy

- ➔ • Work as Sports Team Physiotherapists, Athletic Rehabilitation Specialists, or Consultant Physiotherapists.
- Pursue academic and research opportunities in allied health institutions.
- Establish private practices focused on sports rehabilitation and injury prevention.

➔ Fellowship in Neurological Rehabilitation

- ➔ • Work as a neuro-rehabilitation expert managing conditions like stroke, spinal cord injuries, and Parkinson's disease in hospitals or private neuro clinics.
- Conduct advanced research in neuroplasticity, rehab technology, or evidence-based neuro-rehab, contributing to scientific publications and innovation.
- Serve as a faculty or trainer in neuro-rehabilitation, develop curriculum, and guide students and professionals in advanced neurophysiotherapy practices.

Prospects and Future

➔ Fellowship in Orthopedic Manual Therapy

- ➔  **Orthopedic Manual Therapy Expert:** Specialize in treating musculoskeletal disorders like back pain, joint dysfunctions, and sports injuries using hands-on techniques in hospitals, clinics, or private practice.
-  **Clinical Researcher:** Engage in research on manual therapy techniques, biomechanics, and pain science; contribute to evidence-based protocols and publish in peer-reviewed journals.
-  **Academic & Skill Trainer:** Teach orthopedic manual therapy in academic settings, conduct workshops and certifications, and mentor budding physiotherapists in hands-on therapeutic skills.

➔ Fellowship in Pediatric Physiotherapy

- ➔  **Pediatric Rehab Specialist:** Work with children having developmental delays, cerebral palsy, muscular dystrophy, and other pediatric conditions in hospitals, therapy centers, or early intervention clinics.
-  **Research & Innovation:** Conduct research on child development, motor learning, and pediatric intervention techniques; contribute to pediatric care guidelines and evidence-based practices.
-  **Educator & Trainer:** Take up teaching roles in physiotherapy colleges, lead workshops and seminars on pediatric rehab, and mentor students or junior therapists in pediatric physiotherapy.

Eligibility Criteria

➔ To qualify for admission, applicants must meet one of the following criteria:

- **MPT holders** with at least 2 years of post-graduation experience.
- **BPT holders** with at least 5 years of post-graduation experience.
- Additionally, **two recommendation letters** from practicing physiotherapists are required.

Fellowship Duration

- **Total Duration: 6 months** (self-paced)

Includes time for research, independent study, and thesis submission.

Fellowship Fees

- **36,000 INR**

(For complete Fellowship, Including Complimentary IACP Life Membership worth 9,400 INR)

Admission Process

➔ **Application Submission:**
Complete the application form and submit required documents.

➔ **Verification of Documents:**
IACP verifies the applicant's credentials.

➔ **Enrollment Confirmation & Fee Payment:**
Successful applicants receive a confirmation email. And Pay the Fees after Confirmation.

➔ **Research Topic Proposal:**
Submit five proposed research topics for review.

➔ **Topic Selection:**
IACP selects one approved topic for the fellowship thesis.

Admission Form:

[Click Here](#)

to download & fill the application form.

Or Download Directly from the website.

Print the Application form, and Fill the complete form and attach the documents mentioned on the second page.

Complete the form and send the form from any of the two means-

OptionI-

Send the complete hard copy via land mail to Headquarter's address.

OptionII-

Scan the complete application form with all the documents and send the scanned PDF via email at fellowship@charteredphysiotherapy.com

Steps to Complete the Fellowship

Step One

Filling of the Application Form. And Acceptance of your Application.

Step Two

Send the Requisite Documents for Verification purpose. (Your Documents will be Verified by The IACP)

Step Three

Enrollment Confirmation or Decline. (You will get this by Email)
If confirmed Pay the Fellowship Fees.

Step Four

Propose 5 Topics for your Research Fellowship Work.

Step Five

Selection of a Topic.
(One of the Topic amongst your proposed topics will be selected by The IACP)

Step Six

Start Working on your Fellowship Research Work. (All the requisite information that you have to follow during the Fellowship will be shared with you by this time.)

Step Seven

After 6 months, Submit your Work.
Physical Bind File (Via mail) + Digital PDF File (via email)

Step Eight

Acceptance of the Research Work & Awarding of the Fellowship.
